Can someone tell me what to do on this):

Identify each of the following names of the groups in the periodic table.	
Group 1-	a. Halogens
Group 2-	b. Alkaline Earth Metals
Group 3-12-	c. Chalcogens
Group 16-	d. Transitional Metals
Group 17-	e. Noble Gases
Group 18-	f. Alkaline Metals

Answer 1

Answer: On the periodic table, you will see that they are grouped into different groups. Well, on the right, you have the groups, obviously. You are supposed to match the elements to the group that it is in.

(If you don't know the groups, you can find one online under images.) Hope this helps! Please give brainliest answer!
